Summary

AI-integrated Full-Stack Engineer who ships production SaaS solo — 3 live AI products including a code review platform that cuts LLM token costs by 60 percent and a resume-to-portfolio tool that reduces manual build time by 85 percent . 1 year professional experience across MERN + Groq/OpenAI LLM pipelines, JWT security, and deployment (Vercel, Render, MongoDB Atlas). Available for remote contract or full-time work

Technical Skills

Languages: JavaScript (ES6+), Java, Python, SQL, HTML5, CSS3

Frontend: React.js, Tailwind CSS, TanStack Query, Recharts, Framer Motion, Responsive Design

Backend: Node.js, Express.js, REST API, JWT, bcrypt, Rate Limiting, Helmet

AI / LLM: Groq API, Prompt Engineering, LLM Pipeline Design, OpenAI

Databases & Tools: MongoDB, Mongoose, Git/GitHub, Postman, Vercel, Render

Core CS: Data Structures, Operating Systems, DBMS, Computer Networks

Projects

AI Code Reviewer | *MERN, Groq AI, GitHub API* Live | GitHub

- Built a full-stack AI SaaS where developers submit GitHub repositories and receive automated code reviews across 9 quality dimensions, including security, architecture, performance, and scalability, powered by the Groq LLM API.
- Engineered a GitHub REST API pipeline that filters 60% of irrelevant tokens, including node_modules, CSS, and configuration files, before LLM processing, reducing API costs and improving review accuracy.
- Secured the backend with JWT authentication, bcrypt (12 salt rounds), and tiered rate limiting (100 req/15 min global and 10 req/15 min on authentication routes); deployed on Vercel, Render, and MongoDB Atlas.

AI Resume to Portfolio Builder | *React, Node.js, MongoDB, Groq AI, Netlify API, JWT* Live | GitHub

- Developed an AI SaaS that converts resumes into deployment-ready portfolios in under 10 seconds.
- Used Groq AI with multi-model fallback for structured data extraction, cutting manual creation time by 85%.
- Integrated Netlify API for one-click live deployment and secured endpoints with JWT-protected routing and API rate limiting.

InvoiceForge: Invoice Generator | *React, Tailwind CSS, jsPDF, LocalStorage* Live | GitHub

- Optimized frontend delivery via lazy loading, increasing page load speed by 40%.
- Created a 3-state workflow using LocalStorage to securely store 50+ invoices locally.
- Engineered zero-layout-shift PDF export functionality using the jsPDF library.

Experience

Full Stack Developer June 2025 – Dec 2025
Affimintus *Indore, MP*

- Developed full-stack MERN apps using MVC, boosting query performance by 25% via indexing.
- Built reusable React components to standardize state management and improve maintainability.
- Implemented secure user authentication workflows using JWT tokens and bcrypt encryption.
- Managed codebase and deployments using structured Git workflows, PRs, and conflict resolution.

Frontend Developer April 2023 – Oct 2023
Jobsense *Ujjain, MP*

- Created responsive layouts with 100% cross-browser rendering accuracy using HTML5/CSS3/JS.
- Built interactive UI modules using modern layout techniques like CSS Flexbox and Grid.
- Collaborated in Git-based feature teams to write clean, semantic markup.

Education

Mahakal Institute of Technology [RGPV] Ujjain, MP
B.Tech in Computer Science | CGPA: 7.00/10 *2022 – 2026*

Lokmanya Tilak School [MP Board] Ujjain, MP
Higher Secondary Education | CGPA: 7.2/10 *2020 – 2022*
